

SUBLIMATION

A new solution for Polyester products

What is Sublimation? It's a printing process where the figure is marked by heat and pressure on the surface to which it was transferred.

Because of its unique process, our sublimation works on polyester surfaces only. The sublimation can be made onto satin labels, tapes, ribbons, elastics and fabrics as decorative appliqués to be applied by our customers.

Soft feel to the touch

Applied through heat, the artwork becomes part of the surface its applied to; polyester label, tape, elastic or a fabric. There is no difference to the touch between the surface with the artwork and the one without it!

Versatility and Convenience

We offer labels, tapes and elastics* as final products and for decorative appliqués we offer them as transfer sheets to be applied by our customers at their own pace and location.

With our Sublimation line you can create all types of artwork from the simplest to the most elaborate, even artwork with gradient effects. Just send us the artwork and we'll show you how it all works.

* Elastics need to be provided by the customer for Finotex to imprint.
