

FX1000HT®

Versatility of On-Demand Printing

The FX-1000HT® printer allows you to print at your own pace and location. On-demand printing enables you to create a number of thermal printed tags specific to your variable information. This gives you the self-sufficiency that you need and contributes towards your goal of on-time finished-goods delivery to your customers.

Hidden Cost Savings

With the FX-1000HT® you can print all the variable information directly on the tag. The stickers with all the variable information which you use to print separately and then apply them to tags... are no longer necessary! This represents cost savings on stickers and labor for your company.

World-class Technical Support

Our specialized Technical Support teams are available to serve you upon request. Whether it's a scheduled maintenance visit or an emergency call, our in-country teams are there to help you deliver.

For more information on our offerings, please contact your Sales Representative.

The FX-1000HT® prints on one side at a speed of 200 mm/ second at an optimum print density of 300 dpi giving your tags a clean and defined print. It's equipped with a fixed stacker.

SYSTEM SPECIFICATIONS

Printing method	Thermal transfer
Printing density	300 dpi
Printing speed	200 mm/sec
Print width	64 mm
Print length	250 mm
Number of print heads	1
Media type	Single-piece tags
